## **Doosan Forklift Part**

Doosan Forklift Part - Doosan Infracore Company Ltd. is an intercontinental company consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Technologies and Machine Instruments and Mechanization Systems.

Their United States partner, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer requirements.

With a system consisting of over 90 autonomous sellers, the lift truck group supplies quality materials handling equipment to the broad North American marketplace. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and product sales places all through Canada and the U.S. The forklift product line remarkably features 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various vehicle designs vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck company in the North American market, thanks to its exceptional level of product performance and their persistently high level of consumer support and service given to all Doosan Infracore Lift Truck users. The U.S. forklift division stationed in Cleveland has a expert team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Initially the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion project. Sales of these products were originally targeted to state-run companies, large scale corporations, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and rapidly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a position of substantial growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the very competitive North American materials handling industry. This joint-venture proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company completed construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a international sales system and started exporting designs they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
